SVGo Clients in the Repo

svgdef	Creates a SVG representation of the API	pattern	Test patterns
android	The Android logo	planets	Show the scale of the Solar system
bubtrail	Bubble trails	pmap	Proportion maps
bulletgraph	Bullet Graphs (via Stephen Few)	randcomp	Compare random number generators
colortab	Display SVG named colors with RGB values	richter	Gerhard Richter's 256 colors
compx	Component diagrams	rl	Random lines
flower	Random flowers	skewabc	Skew ABC
fontcompare	Compare two fonts	stockproduct	Visualize product and stock prices
f50	Get 50 photos from Flickr from a query	svgopher	SVGo Mascot
fe	Filter effects	svgplay	SVGo sketching server
funnel	Funnel from transparent circles	svgplot	Plot data
gradient	Linear and radial gradients	svgrid	Compose SVG files in a grid
html5logo	HTML5 logo with draggable elements	tsg	Twitter Search Grid
imfade	Show image fading	tumblrgrid	Tumblr picture grid
lewitt	Version of Sol Lewitt's Wall Drawing 91	turbulence	Turbulence filter effect
ltr	Layer Tennis Remixes	vismem	Visualize data from files
marker	Test markers	webfonts	"Hello, World" with Google Web Fonts
paths	Demonstrate SVG paths	websvg	Generate SVG as a web server

Sample Bullet Graph

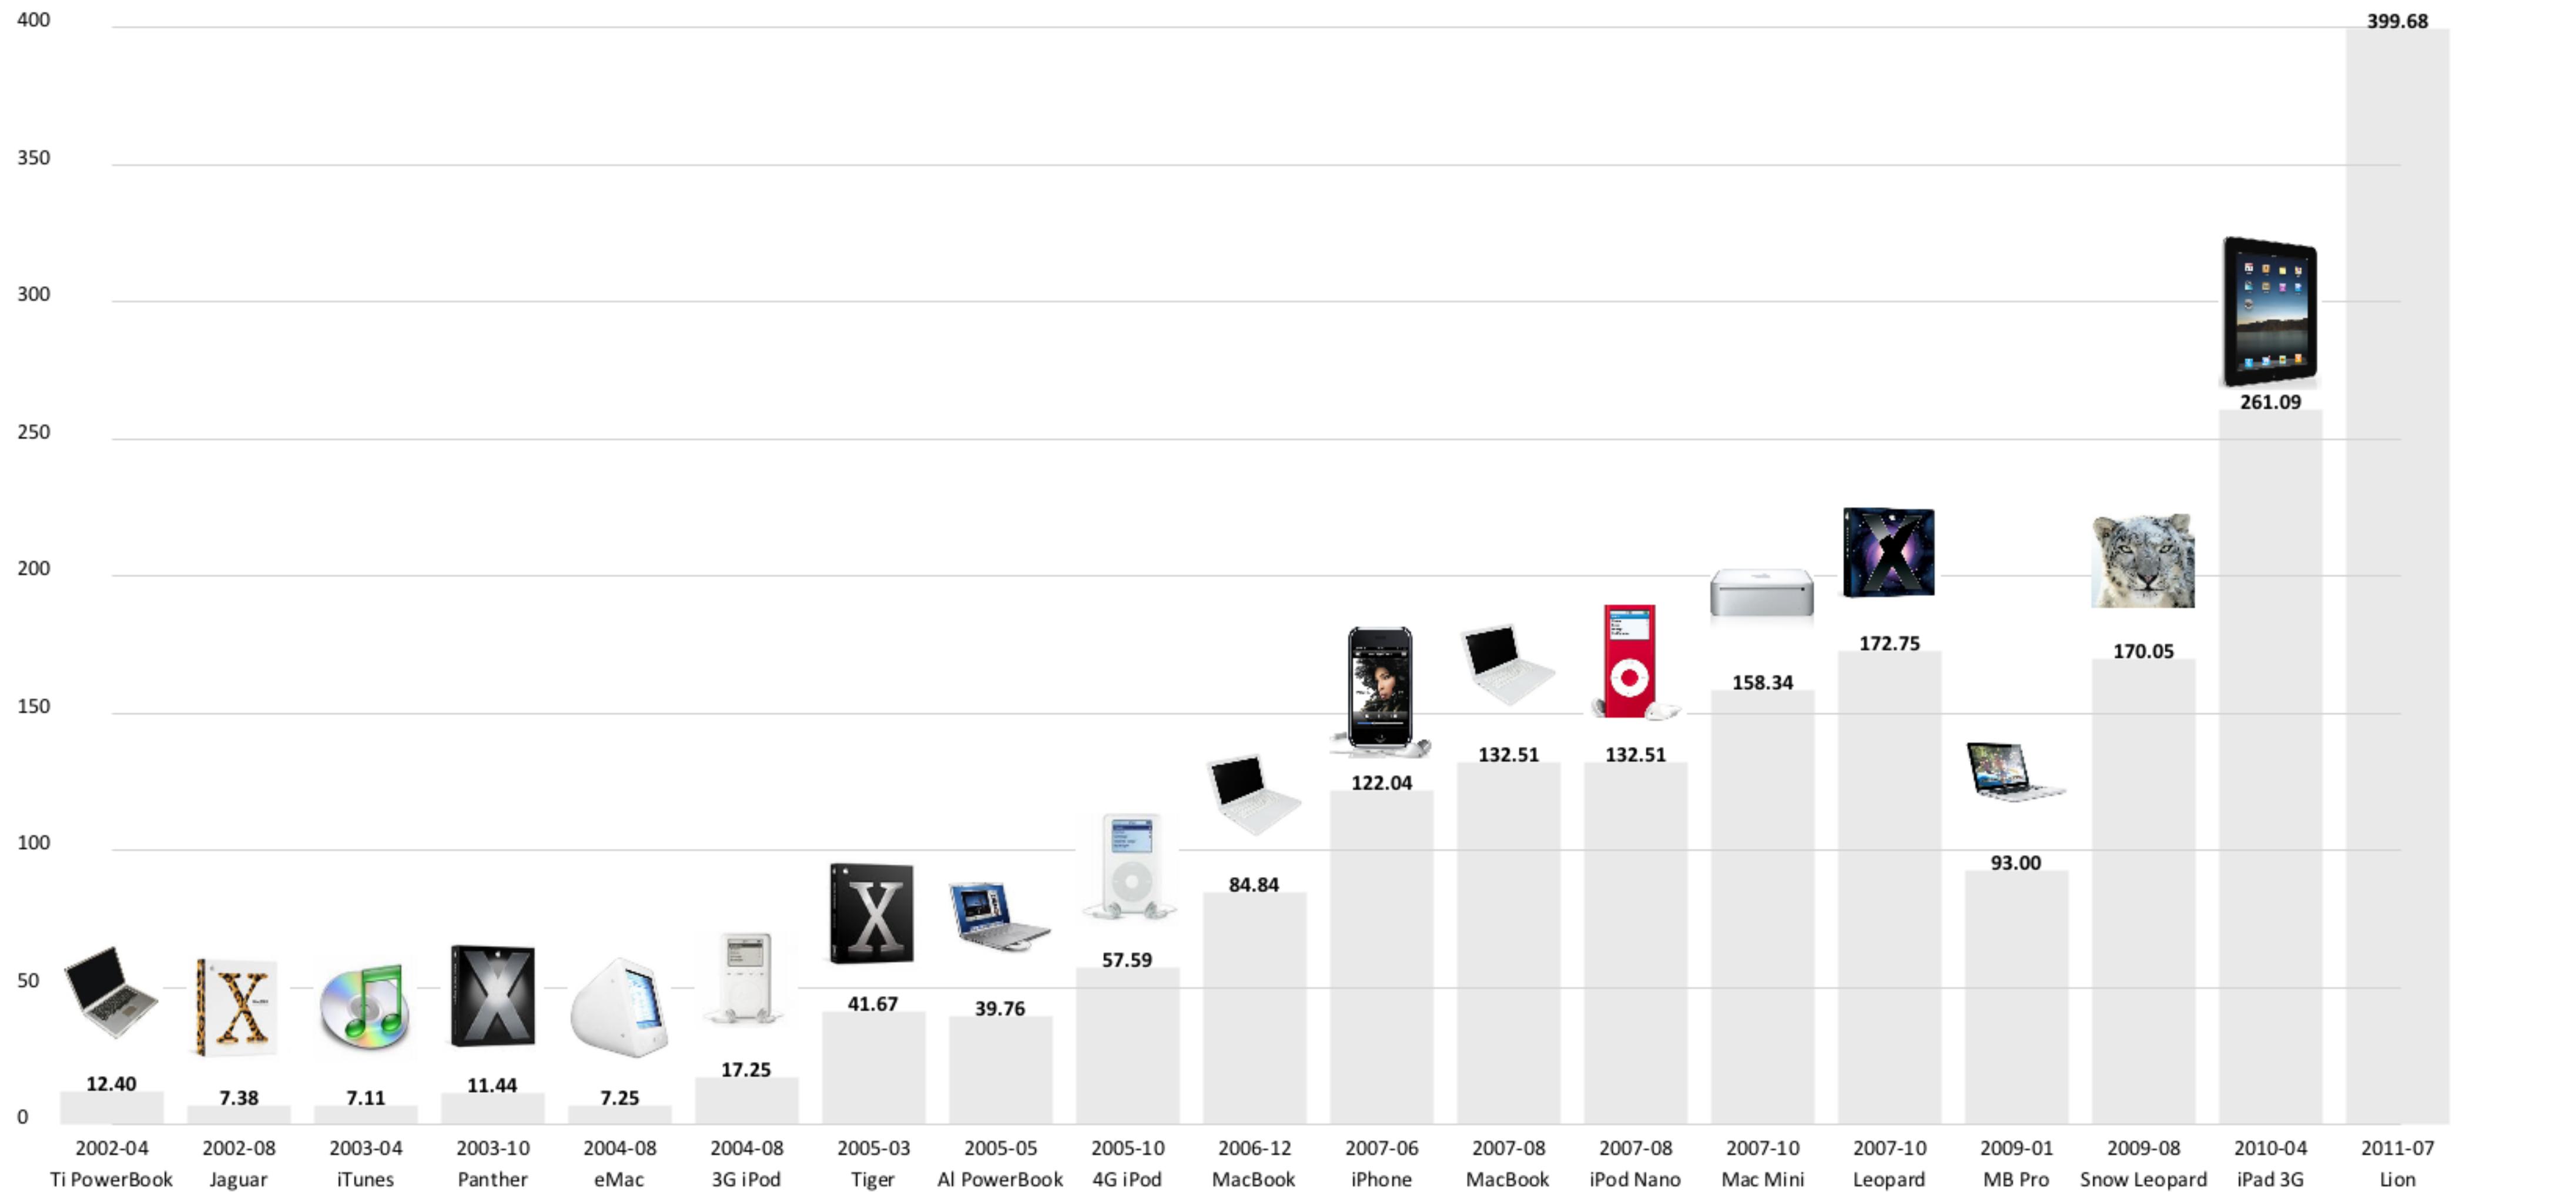

The bullet graph features a single, primary measure (for example, current year-to-date revenue) compares that measure to one or more other measures to enrich its meaning, for example, compared to a target), and displays it in the context of qualitative ranges of performance, such as poor, satisfactory, and good.

Text and Images

hello, this is SVG
x, y

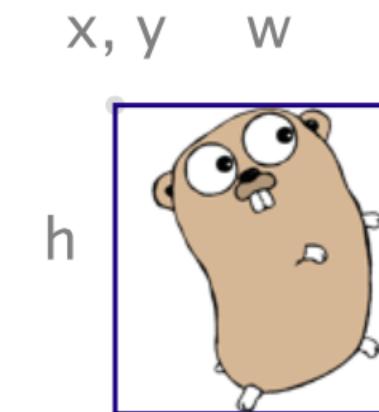

Text(x, y int, s string, s ...string)

It's "fine" & "dandy" to draw text along

Textpath(t string, pathid string, s ...string)

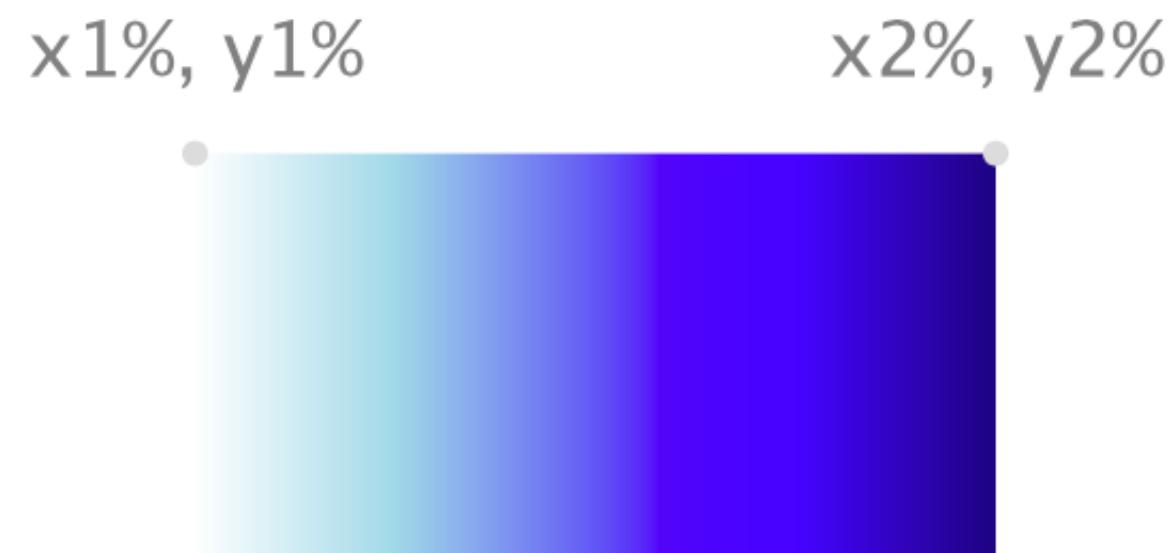

```
New(w io.Writer)  
Start(w, h int, options ...string)/End()  
Startview(w, h, minx, miny, vw, vh int)  
Group(s ...string)/Gend()  
Gstyle(s string)/Gend()
```

Textlines(x, y int, s []string, size, spacing int, fill, align string)

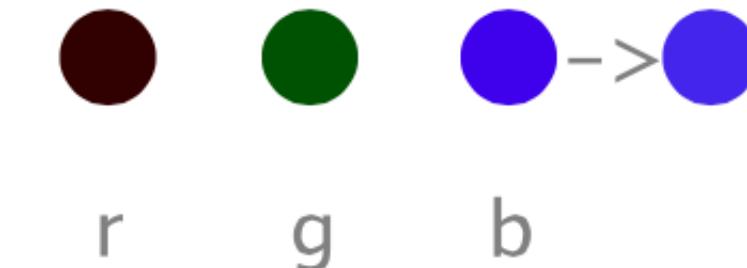

Image(x, y, w, h int, link string, s ...string)

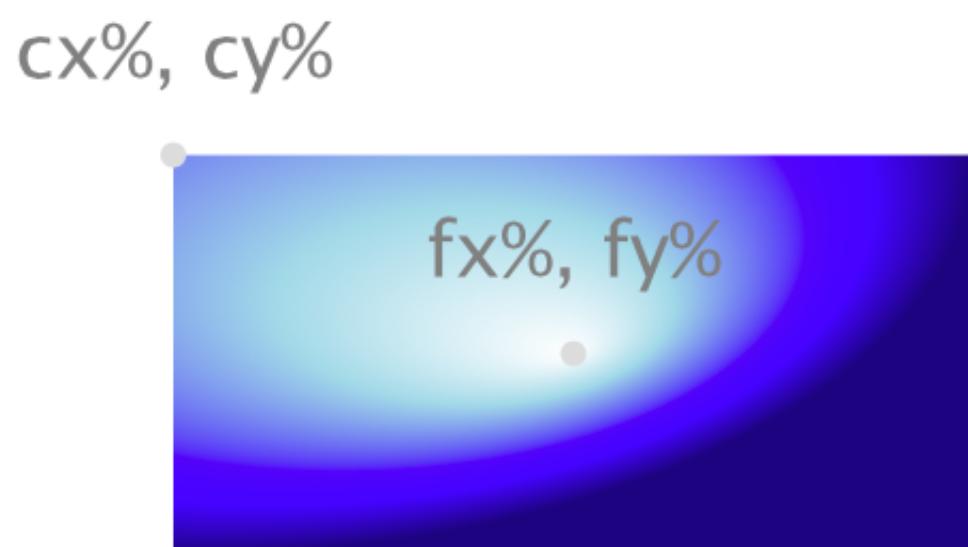

Gradients and Colors

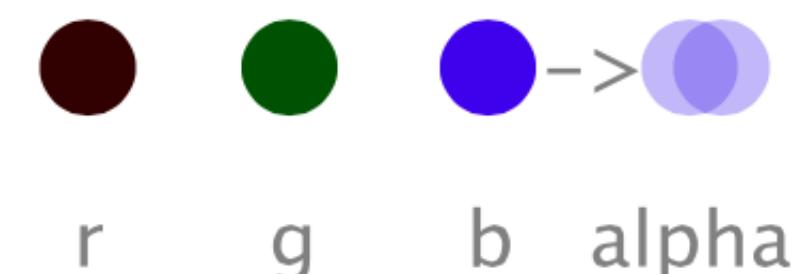

LinearGradient(id string, x1, y1, x2, y2 uint8, sc []Offcolor)

RGB(r, g, b int)

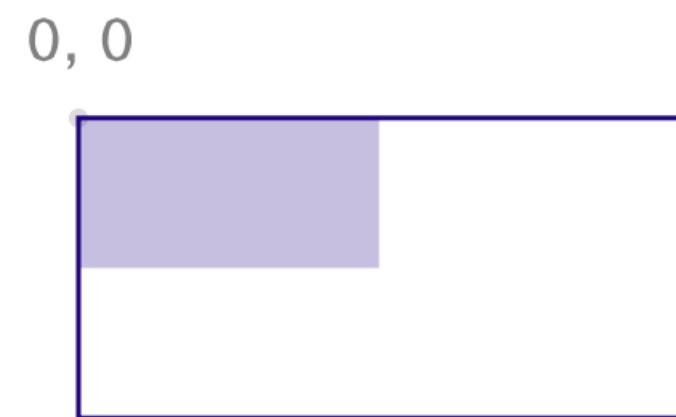

RadialGradient(id string, cx, cy, r, fx, fy uint8, sc []Offcolor)

RGBA(r, g, b int, a float64)

Transforms

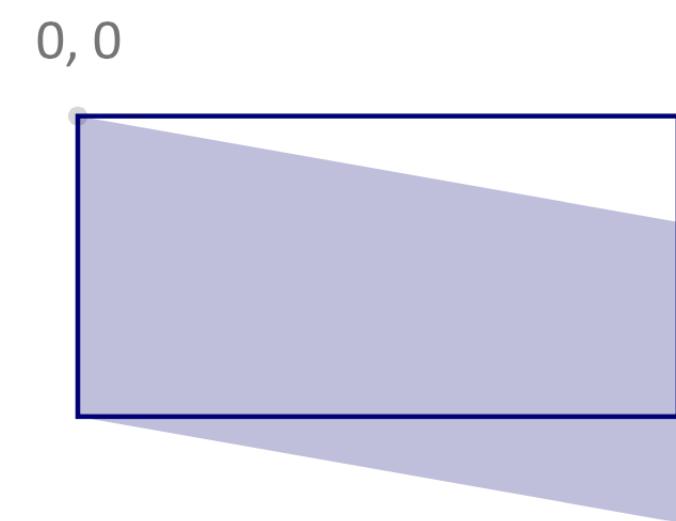

Scale(n float64)

ScaleXY(dx, dy float64)

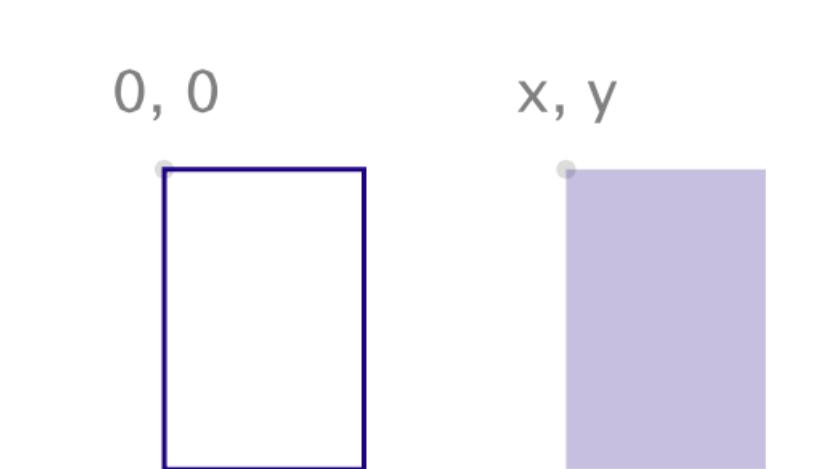

SkewX(a float64)

SkewY(a float64)

SkewXY(ax, ay float64)

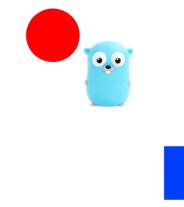

Translate(x, y int)

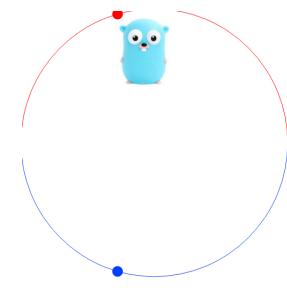

Rotate(a float64)

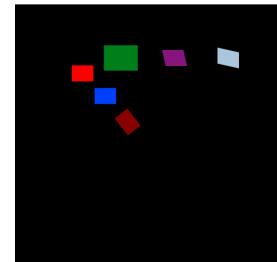

Animation

Animate(link, attr string, from, to int, duration float64, repeat int, s ...string)

AnimateMotion(link, path string, duration float64, repeat int, s ...string)

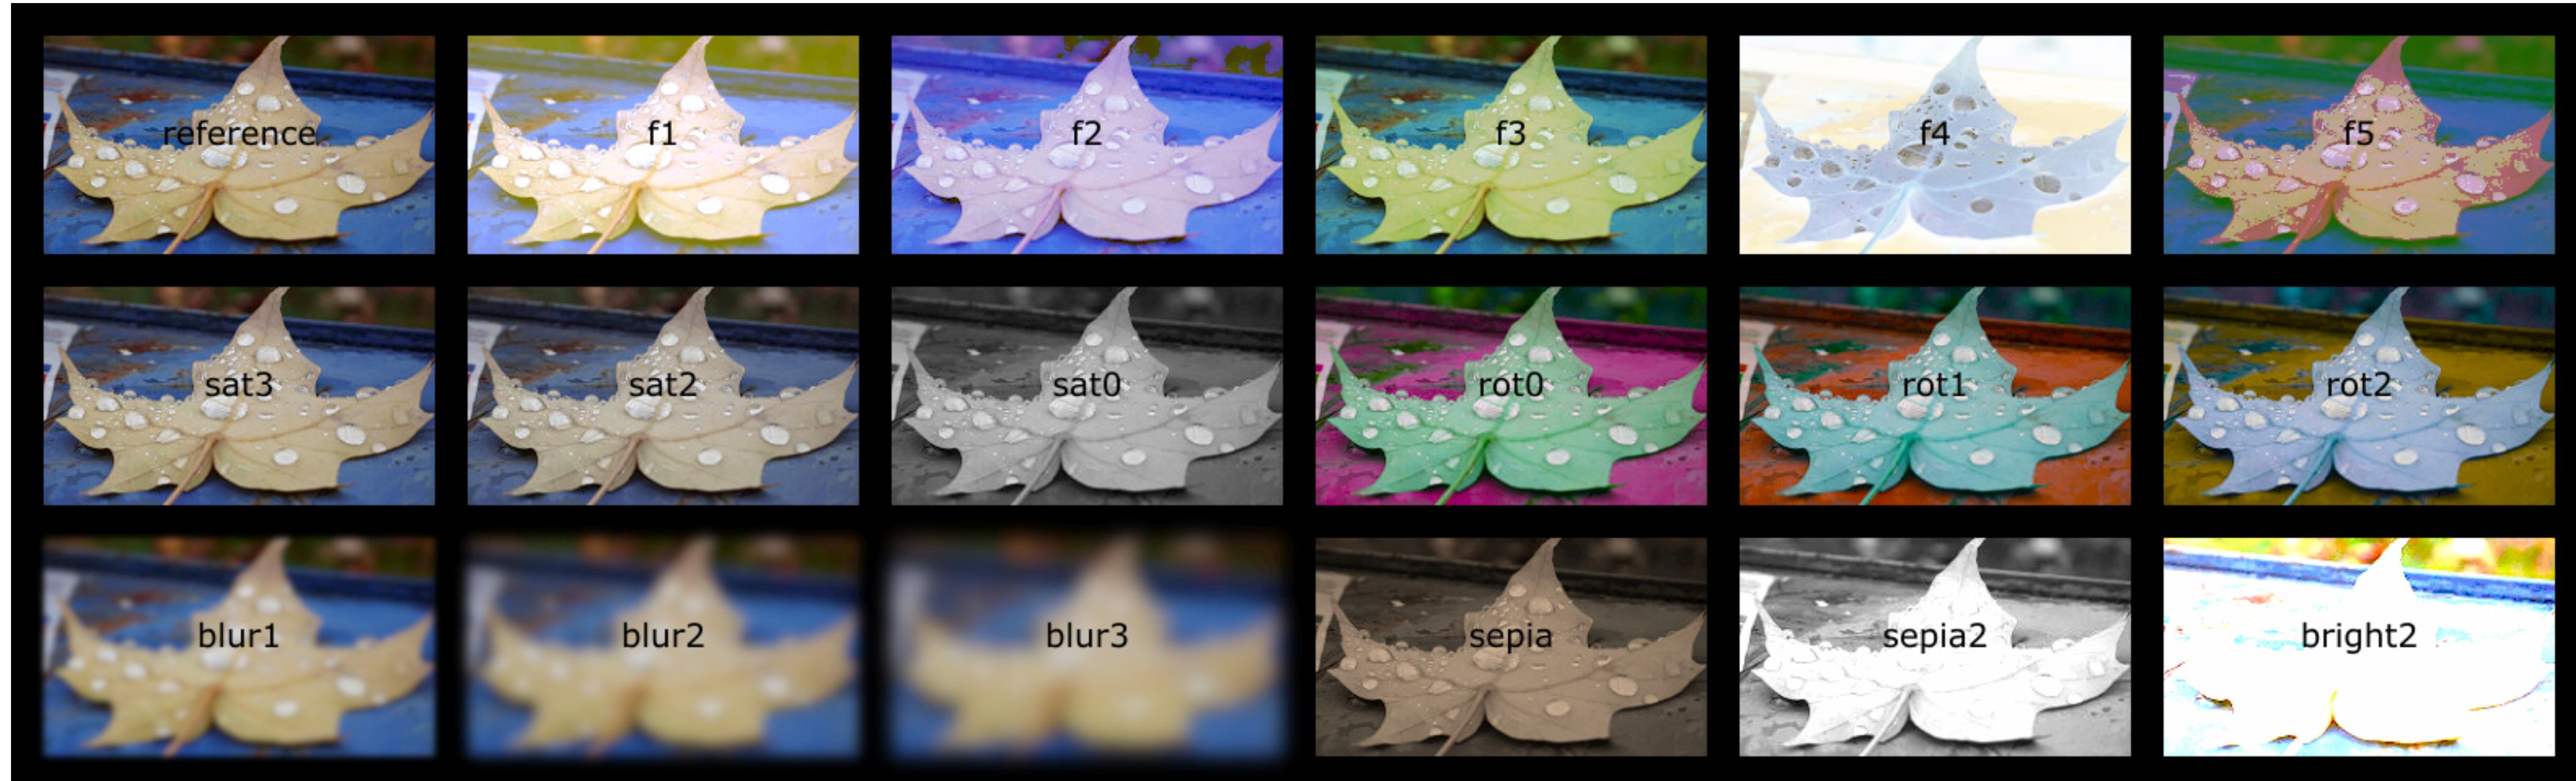

AnimateRotate(link string, fs, fc, fe, ts, tc, te int, duration float64, repeat int, s ...string)

AnimateScale(link string, from, to, duration float64, repeat int, s ...string)

AnimateSkewX(link string, from, to, duration float64, repeat int, s ...string)

AnimateSkewY(link string, from, to, duration float64, repeat int, s ...string)

Filter Effects

Sketching with code

```
package main

import (
    "os"
    "github.com/ajstarks/svg"
)

func main() {
    width := 960
    height := 540
    style := "fill:white;font-size:60pt;text-anchor:middle"
    canvas := svg.New(os.Stdout)
    canvas.Start(width, height)
    canvas.Rect(0, 0, width, height)
    canvas.Circle(width/2, height, width/2, "fill:rgb(44,77,232)")
    canvas.Text(width/2, height/2, "hello, world", style)
    canvas.End()
}
```

(Shift-Enter to compile and run.)

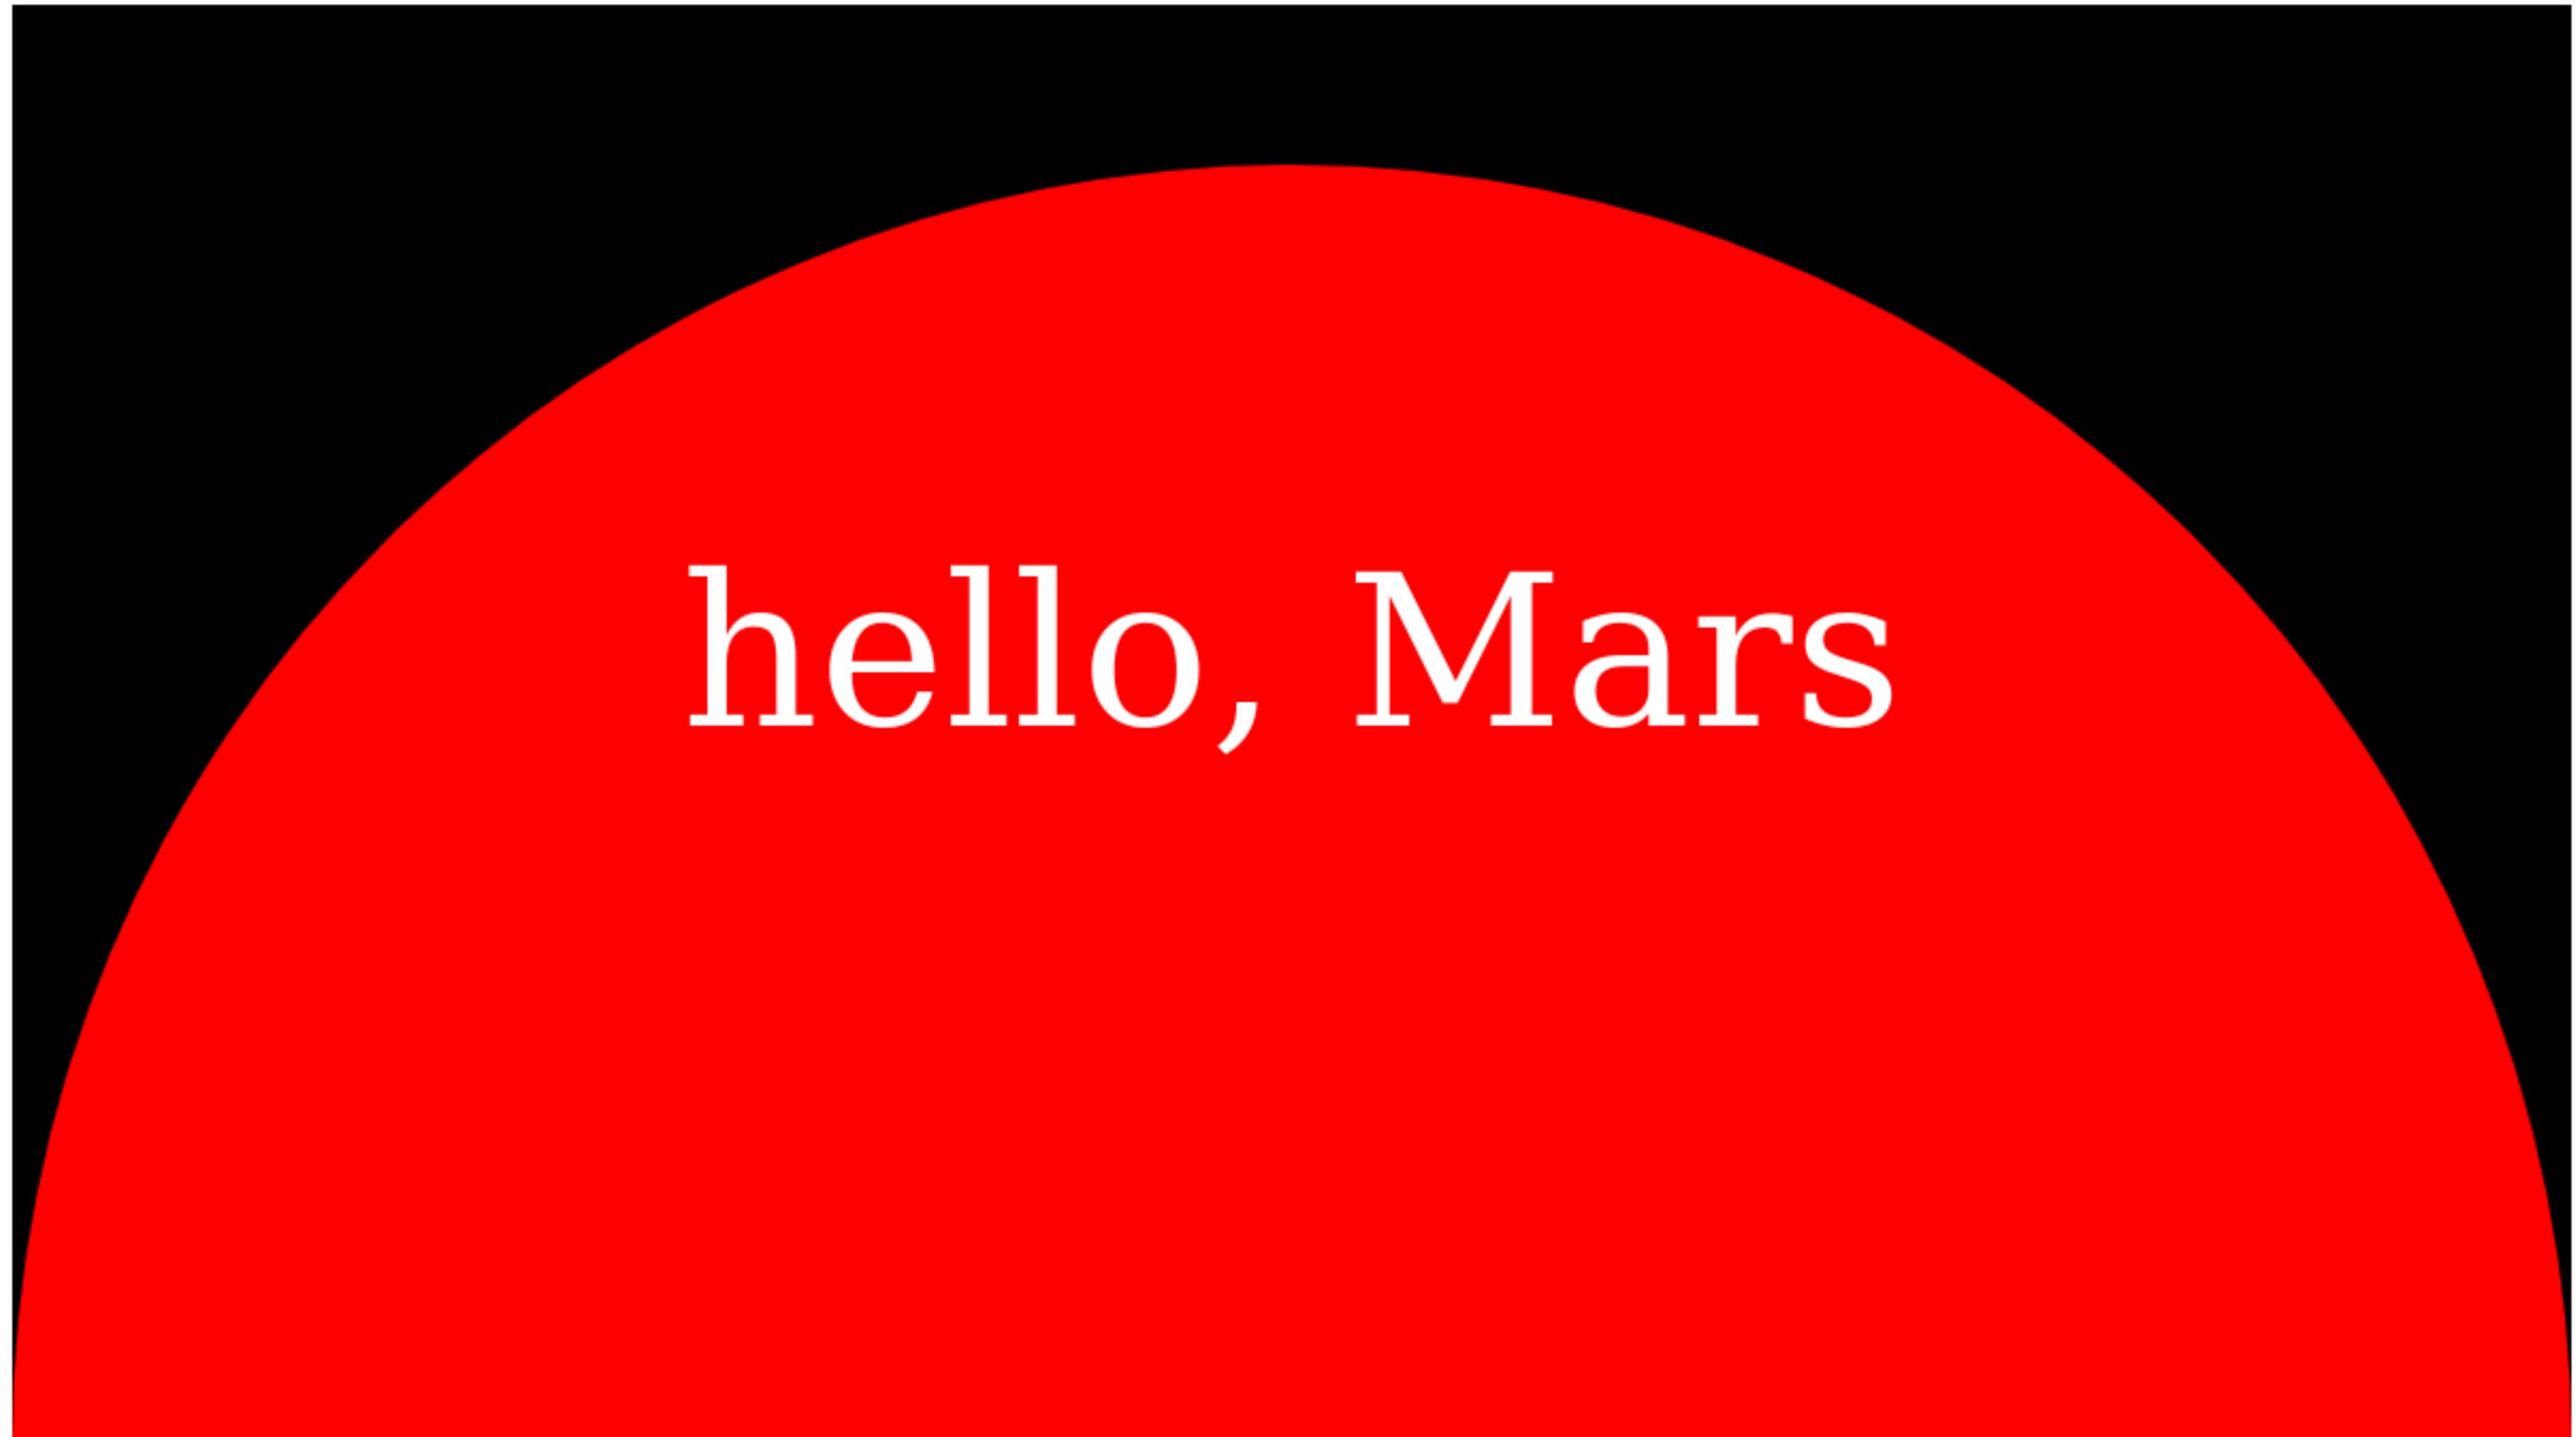

Compile and run after each keystroke

```
package main

import (
    "os"
    "github.com/ajstarks/svg"
)

func main() {
    width := 960
    height := 540
    style := "fill:white;font-size:60pt;text-anchor:middle"
    canvas := svg.New(os.Stdout)
    canvas.Start(width, height)
    canvas.Rect(0, 0, width, height)
    canvas.Circle(width/2, height, width/2, "fill:red")
    canvas.Text(width/2, height/2, "hello, Mars", style)
    canvas.End()
}
```

(Shift-Enter to compile and run.)

Compile and run after each keystroke

Running svgplay

```
$ git clone https://github.com/ajstarks/svgo-workshop  
$ cd svgo-workshop/code/svgplay-samples  
$ svgplay  
svgplay 2020/02/28 17:58:43 ⚠️ ⚠️ ⚠️ Warning: ...  
http://127.0.0.1:1999/hello.go
```

    headfmt   = "New York Times %s stories: %s"
    datefmt   = "Monday Jan 2, 2006"
    usage     = `section choices:
arts, automobiles, books, business, fashion,
food, health, home, insider, magazine, movies,
national, nyregion, obituaries, opinion, politics,
realestate, science, sports, sundayreview, technology,
theater, tmagazine, travel, upshot, world`  
)
```

Data Structures

```
// NYTStories is the headline info from the New York Times
type NYTStories struct {
    StoryCount int      `json:"num_results"`
    Results     []result `json:"results"`
}

type result struct {
    Title      string   `json:"title"`
    URL        string   `json:"url"`
    Multimedia []multimedia `json:"multimedia"`
}

type multimedia struct {
    URL      string `json:"url"`
    Width    int    `json:"width"`
    Height   int    `json:"height"`
    Format   string `json:"format"`
}
```

Main

```
func main() {
    var section = flag.String("s", "home", usage)
    var nstories = flag.Int("n", 25, "number of stories")
    flag.Parse()

    width, height := 1000, (*nstories/5)*150
    canvas := svg.New(os.Stdout)
    canvas.Start(width, height)
    canvas.Rect(0, 0, width, height)
    nytStories(canvas, width, *section, *nstories)
    canvas.End()
}
```

Network

```
// netread dereferences a URL, returning the Reader, with an error
func netread(url string) (io.ReadCloser, error) {
    client := &http.Client{Timeout: 30 * time.Second}
    resp, err := client.Get(url)
    if err != nil {
        return nil, err
    }
    if resp.StatusCode != http.StatusOK {
        return nil, fmt.Errorf(errfmt, url, resp.Status)
    }
    return resp.Body, nil
}
```

Read and Decode

```
// nytStories retrieves Top Stories data
// from the New York Times API, decodes and displays it.
func nytStories(canvas *svg.SVG, width int, section string, n int) {
    r, err := netread(fmt.Sprintf(NYTfmt, section, NYTAPIkey))
    if err != nil {
        fmt.Fprintf(os.Stderr, "headline read error: %v\n", err)
        return
    }
    defer r.Close()
    var data NYTStories
    if err = json.NewDecoder(r).Decode(&data); err != nil {
        fmt.Fprintf(os.Stderr, "decode: %v\n", err)
        return
    }
    drawStories(canvas, stories, width, data, n)
}
```

Drawing (setup)

```
// drawStories walks the result structure,  
// displaying title and thumbnail in a grid  
func drawStories(canvas *svg.SVG, section string, width int, data NYTStories, n int)  
top, left := 100, 150  
titley := top - 50  
x, y := left, top  
ts := fmt.Sprintf(headfmt, section, time.Now().Format(datefmt))  
if n > data.StoryCount {  
    n = data.StoryCount  
}
```

Drawing

```
canvas.Gstyle(style)
canvas.Text(width/2, titley, ts, "font-size:250%")
for i := 0; i < n; i++ {
    d := data.Results[i]
    tw, th, imagelink := imageinfo(d)
    if i > 0 && i%5 == 0 {
        x = left
        y += th + (th / 2)
    }
    canvas.Link(d.URL, d.Title)
    canvas.Image(x, y, tw, th, imagelink)
    canvas.Text(x+tw/2, y+th+12, struncate(d.Title, 20))
    canvas.LinkEnd()
    x += tw * 2
}
canvas.Gend()
```

Helpers

```
// struncate truncates a string with ellipsis
func struncate(s string, n int) string {
    if len(s) <= n {
        return s
    }
    return s[0:n] + "..."
}

// imageinfo returns the thumbnail image information
func imageinfo(data result) (int, int, string) {
    for _, m := range data.Multimedia {
        if m.Format == "Standard Thumbnail" {
            return m.Width, m.Height, m.URL
        }
    }
    return 75, 75, ""
}
```

Running nytsvg

```
$ git clone https://github.com/ajstarks/svgo-workshop  
$ cd svgo-workshop/code  
$ go run nytsvg.go -s food > f.svg
```

Open f.svg in your browser
